We are not including impact incentives

Actions for next reporting period

13. Outline activities that you will undertake in the coming reporting period to advance your cage-free commitment.

We hope the corn trade stabilizes prices and allows us to go back to negotiating with our liquid and egg whites providers for them to offer us reasonable prices for cage-free alternatives

Challenges

14. Explain obstacles you've encountered this reporting period in sourcing cage-free eggs.

The international trade crisis brought by the covid19 created a corn shortage in Colombia and other Latin American countries. That affected the egg industry and egg prices grew a lot. In order to keep the restaurants working, we needed to put on hold the negotiations related to cage-free liquid eggs because all possible suppliers were charging +30% more for cage-free products. Due to egg shortage, we also needed to purchase non-cage-free shell eggs for some of our restaurants, because the suppliers didn't have enough cage-free eggs to cover our needs.

Additional information

15. Please include any additional information you'd like us to know about your cage-free egg policy and implementation.

Even though we don't include in our commitment products manufactured on behalf of other companies we have been having conversations with the main providers of products that use eggs in their recipes to raise awareness regarding animal wellbeing
